企业简介

BRIEF INTRODUCTION

中国新兴进出口有限责任公司 1984 年成立，原隶属于中国人民解放军总后勤部，是中国政府部门及军队批准的专营军需品及后勤装备产品出口的大型国有军贸公司，公司有多家生产企业，是中国经营规模最大的军需品及后勤装备产品的生产供应商，生产的主要产品包括军用服装及附件、鞋靴、装具、防弹产品、警用产品，以及车辆和野战装备等。

公司与世界上 100 多个国家开展了军需品及后勤装备产品等往来业务，经营的主要市场分布于非洲、美洲及部分欧洲、亚洲，年出口军需品及后勤装备产品 4 亿美元。

公司始终坚持“质量、价格、服务”的经营理念，按客户对产品的要求，用最新的技术、最好的品质、最优的服务生产客户所需的产品。

公司讲信誉、守合同、重质量，在国际上形成了良好的声誉和影响，公司热忱希望与国外各界朋友在开展军需品及后勤装备产品等方面建立广泛的合作关系。

POLICE

POLICE

Founded in 1984, China Xinxing Import and Export Co., Ltd. (CXXC) was affiliated to the General Logistics Department of People's Liberation Army (PLA). Having been approved by China's government and PLA, CXXC, a large state-owned military trade company, is engaging in the export of military supplies and logistics equipment. CXXC, with many production bases, is the largest supplier in producing military supplies and logistics equipment. Its main products include military uniforms and accessories, boots and shoes, webbings and equipment, bulletproof products, police products, vehicles, and field armaments.

CXXC has established business relationship with more than 100 countries in military supplies and logistics equipment. Its trading market mainly distributes in Africa, America and some countries in Europe and Asia with annual export value in this line 400 million U.S. Dollars.

CXXC always adheres to the business philosophy of credibility first, quality first and service first, to use first-class technology, first-class products, first-class service to offer customers products they need.

CXXC enjoys a good reputation in the world, being well-known for quality first, credibility focused and contract honored. CXXC sincerely hopes to join hands with customers around the world in the field of military supplies and logistics equipment.

CXPBV-AH06

Bullet-proof and stab-proof vest
复合防弹防刺服

材质：防弹纤维和防刺纤维复合而成
防御等级：国内警用防弹衣三级，能防79微冲铅芯弹的贯穿
防刺等级：符合公安部检测标准
• material: bullet-proof and stab-proof fiber mixed
• function: bullet-proof and stab-proof

CXPBV-AH05

Bullet-proof vest
防弹衣

材质：凯夫拉防弹纤维
防御等级：国内警用防弹衣二级，能防54手枪铅芯弹的贯穿；
国内警用防弹衣三级，能防79微冲铅芯弹的贯穿。

CXPBV-35A

Stab-proof vest
防刺衣

材质：高分子聚乙烯纤维（软质）、钛铝合金板（硬质）。
防御性能：能防刀刺及锐器的刺穿。
• material: PE fiber or alloy aluminum plate is available
• defense performance: can resist knife and sharp objectives

CXPBV-AH01

Bullet-proof vest
防弹衣

材质：高分子聚乙烯或凯夫拉防弹纤维
防御等级：美国NIJ标准 IIIA 级，能防9毫米弹或.44弹

CXPBV-AH02

Bullet-proof vest
防弹衣

CXPBV-AH03

Bullet-proof vest
防弹衣

CXPBV-AH04

Bullet-proof vest
防弹衣

• material: PE or Kevlar ballistic fiber is available
• defense level: NIJ IIIA can resist 9 mm FMJ RN bullets or .44 Magnum SJHP bullets

CXBPS-AH01

Hand hold bullet-proof shield
手持式防弹盾牌

CXBPC-AH01

Bullet-proof plate
防弹插板

CXBPT-AH01

Explosive blanket
防爆毯

CXBPF-AH01

Explosive fence
防爆围栏

材质：防弹钢板

尺寸：950*500*4.5mm, 900*500*4.5mm, 850*500*4.5mm, 750*450*4.5mm

防弹等级：美国NIJ III级，能防AK-47, M14, M80, SS109等步枪弹的贯穿

重量：13-18KG

• material: ballistic steel plate
• size: 950*500*4.5mm, 900*500*4.5mm, 850*500*4.5mm, 750*450*4.5mm are available, also can make as you required
• defense level: up to NIJ III(can resist AK-47, M14, M80, SS109 and so on)
• have transparent vision window and shooting hole
• more larger than common bullet-proof vest, which can protect human life effectively
• weight: 13 to 18 kg

材质：防弹陶瓷板、防弹PE板及防弹钢板三种

尺寸：30*25厘米

防御等级：防弹陶瓷板、防弹PE板能达到美国NIJ III级及NIJ IV 级标准，而防弹钢板能达到美国NIJ III级标准。美国NIJ III级能防御SS109, M14, M16, M80 and AK-47等步枪弹的贯穿，而NIJ IV级能防御M2穿甲弹的贯穿。

• material: Ballistic Ceramic , Steel or PE plate is available
• size: 10*12inch
• defense level: NIJ III & NIJ IV
NIJ III can resist SS109, M14, M16, M80 and AK-47
NIJ IV has higher level than NIJ III, which can resist M2 armor piercing bullets

爆毯，防爆围栏具有质轻，携带方便，操作简单，抗爆性优等特点。

用于爆炸物的隔离，保护，要求防爆的装备.尺寸：防爆毯1200×1200(mm) 1600×1600(mm) 防爆围栏:300×400(mm)

使用方法：

防爆毯和防爆围栏配套使用时，先用防爆围栏将可疑爆炸物罩住，并将可疑爆炸物置于围栏中心，再把防爆毯覆盖其上，防爆毯中心对准围栏中心。当82-2式制式手榴弹引爆时，离爆炸中心1m以外的人员不受致命性伤害。当200gTNT裸药引爆时，离爆炸中心3m以外的人员不受致命性伤害。当防爆毯（围栏）被爆炸后，不得再次使用。

The Explosive Blanket&Fence provide personnel and property with a protective barrier against NIJ II ammunition, fragments and other effects of munitions detonations. It functions as a safety barrier by surrounding possible explosives or suspicious items, and also serves as an instant ballistic barrier for doors, windows and car seats.

• multiple layers of ballistic material sewn into a fire retardant, water repellent nylon cover
• backpack transportation/storage bag
• rapidly deployable
• size: 1200*1200mm(blanket), 300*400mm(fence)
• available colors: black, olive rrab green, blue

XINXING Tactical Baton is the most tactically sophisticated impact weapon currently available to law enforcement personnel. It is the first choice of the world's most tactically advanced law enforcement department. Easily carried and readily available, XINXING Batons retains all that you have come to expect from ASP. Premium materials, exceptional workmanship, flawless function. This is a baton that combines an incredible psychological deterrence with unparalleled control potential. Quality, durability and performance in every detail.

Main applications

CXLD1000PL

Wide area communications signal shielding system.
Applicable in blocking communications systems with mobile transceivers over an extended range and will not interfere with wireless communications networks with fixed base stations.

CXLD2400PL

Portable digital bomb jammer.
EOD explosives detection for anti-terrorism and defusing personnel, security measures for VIPs, safety measures for SWAT and CAT team members, and radio signal interference and shielding in special locales and situations.

CXLD2500PL

Digital bomb jammer backpack.
EOD explosives detection for anti-terrorism, safety measures for SWAT and CAT team members, and radio signal interference and shielding in special locales and situations.

CXLD3500PM

Portable digital bomb jammer.
Main applications include ensuring the safety of EOD squad during the transfer and disposal of suspect explosive materials and devices, protecting the safety of VIP's in public spaces, and maintaining the secrecy and privacy of important meetings and major events.

CXLD5600VH

High power digital vehicle-mounted jammer system.
Protecting VIPs & convoys.
Providing safety measures for on-site EOD.
Providing emergency countermeasures.

CXLD5700VH

High power digital large vehicle-mounted jammer system.
Protecting VIPs & convoys.
Providing safety measures for on-site EOD.
Providing emergency countermeasures.

Key technical characteristics

- Compact design increases system portability.
- All operations are completely software driven and are effected via on-board computer and hand-held terminal.
- Modular design of interfering frequency bands provides flexibility in system configuration and ensures complete coverage of target frequencies.
- Using advanced software technology adopted in wireless communications, the jamming system provides complete and continuous coverage of frequency range extending from 20 to 2500 (6000) MHz.
- Advanced antenna designs incorporate various broadband antennas, both directional and omni-directional.
- High power broadband interference technology for target frequencies.
- Display of each frequency band's output is clear and easy-to-read. Adjustment for each band's transmission power is simple and reliable.
- Communication ports on top the device can be sealed and opened freely.

Portable X-ray Scanner System CXXC5600VH

This device is a light weight, portable, battery powered x-ray scanning system designed in co-operation with first responders and EOD teams to meet the need of the field operative. It is light weight and comes with user friendly software that helps operators in understanding the functions and operations in a less time.

PORTABLE EXPLOSIVE DETECTOR

CXXCAY05-02

The AY05-02 is one of the most advanced and cost-effective portable explosive detector available in the world, which adopts pseudo random sequence ion door-opening technology and Hardmar algorithm. It improves the signal noise ratio and anti-jamming capacity greatly and reduce false alarm rate efficiently. The devices are widely used by the governments worldwide to detect the presence of explosives and analyze which kind explosive it is.

Hand-held Trace Explosive Detector CXCHW-HAWKEYEIII

HW-HAWKEYEIII is an explosive detector based on fluorescence technique. The fluorescence intensity and the peak position will change when the explosive molecule contacts with fluorescent material. This kind of change is recorded by the high sensitive detector inside the machine, and then this information will be used to analysis if there's explosives.

Hazardous Liquid Detector CXXCHLD001

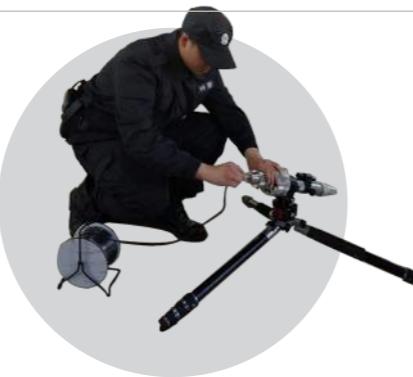

Hazardous Liquid Detector is a security device designed for examining the safety of liquid in sealed containers. Without opening the container, security personnel can receive instant feedback from the device and make decisions about whether the liquid is hazardous to public safety or not. With its high level of performance and precision and without complicated operations, Hazardous Liquid Detector can instantly give results from the liquid with one single scan, which makes it compatible and efficient for security check in public places with large amounts of people, especially for airports, train stations and government agencies.

Explosives Disrupter

CXXCED001

The explosives disrupter also named water jet disrupter is composed of barrel, buffer, laser sight, nozzle, projectiles, tripod, cables, etc. It is mainly used to disposal or destroy dangerous explosives and suspicious objects by police department, armed police department, army and so on.

Removable Jammer

CXXCRJ001

The Portable radio frequency jamming system is to against terrorist organizations as well as criminals. This equipment is specifically design and created to against remote-controlled explosive devices construct or remodel by commonly used radio remote control device and the existing public wireless communication device. Jamming frequency range from 10-3000MHz, it is complete coverage of all the above devices.

Multi-function Stereo Listen Through Wall System

CXXCHWCW-IV

This multi-function stereo listen through wall device is the most updated one in similar products nowadays, which can give listener the clearest audio information they are going to know. This is a special amplifier that will pick up the slightest noise through solid objects like a wall, so you can listen to what is happening on the other side. The contact microphone is a ceramic pin specially developed for converting vibration into audible noise. It has two powerful transducers together comprise an exceptional monitoring device to enable police, prison and so on.

EOD Telescopic Manipulator

CXXCHWJXS-III

Telescopic manipulator is a kind of EOD device. It is comprised of the mechanical claw, mechanical arm, counterweight, battery box, controller, etc. It can control the claw's open and close. This device is used for all dangerous explosive articles disposal and suitable for public security, fire fighting and EOD departments. It is designed to provide the operator with a 3 meters stand-off capability, thus significantly increasing operator survivability should a device detonate.

Colour Low-light Night Vision Investigation System

CXXCHW-CSYS-III

This Colour Low-light Night Vision Investigation System can be used in low-light environment in the night, the evidence of the video and the photo it takes are full colour and high definition. The system consists of digital high-definition color video with very low intensity illumination (The color minimum illumination can reach 0.000001lux), variable-focus professional photographic lens full HD touch screen, SSD hard disk video camera etc. It is portable integrated design, built-in high density lithium battery pack (more than 3 hours using time) and provide large capacity backup battery. It can take true color motion pictures in very dark scene, the variable-focus professional photographic lens (120-300 mm) can clearly distinguish the faces and license plate at 200 meters away. This equipment can not only be applied in the night to get the full HD and full-color image evidence, but also in the daytime, the dynamic range is wide. It can be widely used in public security, frontier defence, fire control, environmental protection and other special department.

CXXCBR6 LEVEL ARMORED

CXXCBR6

CXXCBR6 level is armored using materials, both opaque and transparent, that meet or exceed the requirements of the European CEN 1522/23 and CEN 1063 / NIJ III standards to the level FB6 for opaque areas and BR6 for transparent areas.

T Shape Dual-Sensor Thermal Camera

CXXC4105A-1930

CXXC4105A-1930 T Shape Dual-Sensor Thermal Camera is high-end custom intelligent surveillance camera. A multi-function device be combined with thermal imaging camera, visible CCD, precise actuating and gearing unit, digital decoder, high-performance image processing unit and control unit. CXXC4105A-1930 camera features compact design and accurate positioning. With such functions as presetting and patrolling, the camera leaves no blind spot undetected.

Vehicle-Mounted Optical System Dual Sensor Cooled Thermal Camera

CXXC60824A-0436

CXXC60824A-0436 Vehicle-Mounted Optical System Dual Sensor Cooled Thermal Camera day/night thermal camera. It consists of mid-wave cooled thermal camera, visible light cameras, dynamic organization, precision gears, digital decoder, high-performance image processing unit and controller. All-reinforced structural design, super-strength stainless steel center bearing, multi-round reinforcement design, to ensure the equipment run properly under the condition of the vehicle bump.

Vehicle-Mounted Optical System Thermal Camera

CXXC4105A-2132

CXXC4105A-2132 Vehicle-Mounted Optical System Thermal Camera day/night thermal camera. It consists of thermal imaging cameras, HD visible light cameras, laser ranging, dynamic organization, precision gears, digital decoder, high-performance image processing unit and controller. All-reinforced structural design, super-strength stainless steel center bearing, multi-round reinforcement design, to ensure the equipment run properly under the condition of the vehicle bump.

Military Binocular

CXXCMH6100

CXXCMH6100 Military binocular is rugged lightweight infrared binocular system that uses the latest in low-power, compact, uncooled thermal imaging technology. It used a 640*480px uncloooed thermal sensor with 100mm (also can combined with 50mm/70mm lenses to different detetction range)lens for middle or long distance application. The unique power save design can last battery operation time with fast start up and auto focus ability. Unlike image intensification night-vision devices devices that only magnify existing light , thermal imaging cuts through darkness, through smoke dust and most fogs.

Portable Metal Detector

CXXCYT2101-A8

- ◆ Portable metal detector.
- ◆ Waterproof:IP65.
- ◆ Program Self-diagnostic when power on, automatically checking left and right door panel, LED light and choose the best working frequency.
- ◆ Adopt advanced digital signal processing control replaced traditional analog signal control, better stability.
- ◆ Six mutual over-lapping detecting zones, Simultaneous alarm from multi- zones.
- ◆ Sensitivity adjustable: Each zone has 355 degree sensitivity level, three patterns: High, middle, Low for different requirements. Preset the metal size, weight, volume, location to exclude the coin, key, belt.

EOD SUIT

CXXCEOD001

CXXCEOD001 suit is the personal protection equipment manufactured by our company, which protect against shock overpressure / fragments / high temperature / flame generated by explosion.
